#README

My expertise in software engineering & design thinking, as well as my frequent jaunts into building startups with my peers, have prepared me to design & build digital products that solve meaningful problems.

Education

Bachelor of Science: **Software Engineering**

Graduated: 2020

Milwaukee School of Engineering (MSOE) – Milwaukee, WI, United States

- President of Society of Software Engineers, VP of Student Government, University Innovation Fellow

Employment

Freelance Product Engineer – *Curious Bean LLC (self-employed)*

01/2023 to present

- Building 0 to 1 hybrid mobile apps & websites for startups and small businesses
- Providing product management, project management, and ui/ux design alongside development

Senior Software Engineer, Tech Lead, Product Manager – *RokkinCat LLC*

07/2021 to 12/2022

- Working in small teams to bring product visions to life for startups & SMB's building digital products for the first time
- Released hybrid mobile apps built in Ionic using Appflow and iOS AppStoreConnect
- Product Manager apprentice, worked hand-in-hand with my team's PM to perform responsibilities of the PM like refining the backlog and designing new features, all while managing the day-to-day responsibilities of the development team; also acted as PM internally for our public-facing website
- Using React, Angular, Ionic, Typescript primarily, also Elixir Phoenix, & postgresSQL

Software Engineer – *Direct Supply*

06/2020 to 07/2021

- Full stack development on legacy and new products alike, designing new product with team of six developers, business analyst, and product manager
- Scribed & digested results of user interviews with current customers with fellow UX professionals
- Using React, Typescript, C#, .NET, MySQL, & postgresSQL

Product Development Intern – *MacGregor Partners, LLC*

06/2018 to 03/2020

- Full stack development on dynamic team using Kanban in a team oriented, customer driven environment
- Performed backlog refinement, new feature design, schema design, documentation for users
- Using Angular, Typescript, Java, MySQL

Skills	Ask Me About My “Failed” Startups	Fun Facts
☐ React, Angular ☐ HTML/CSS ☐ JavaScript, Typescript ☐ Java, C#, Elixir ☐ MySQL, postgresSQL ☐ Ionic Appflow, App Store Connect, Google Play Console	★ LiNC (Liberian Network for Careers) ★ Splyt by Socius ★ Socius Education ★ Connoodle	➔ I have a “say anything” type podcast called Gab with Sab ➔ I am the Chair for MSOE’s Software Engineering Industrial Advisory Committee (SE IAC) ➔ I am a University Innovation Fellow who has been invited to help run the annual meetup at both Stanford University & the University of Twente in The Netherlands 4 years in a row
